

Kumar Gaurav

7079143226 | kumargaurav24kg@gmail.com | Bengaluru, India | GitHub | Portfolio | LinkedIn

Technical Skills

Languages: Python (OOP), JavaScript (ES6+), SQL

Core CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Figma

Backend: Flask, REST API Design and Development

Databases: MySQL, SQLite

Tools & Platforms: Git, GitHub, Postman, VS Code

AI/LLM: Groq API, LLM Integration, Prompt Engineering, Pydantic (data validation)

Work Experience

Python Developer Intern | Nasya Software Technologies Pvt. Ltd. | Hyderabad *December 2025 – April 2026*

- Built and maintained **5+ full stack features** for a live product using Python (Flask) and React.js, directly improving functionality for end-users.
- Designed and delivered **RESTful APIs** consumed by the frontend; reduced manual testing time by validating all endpoints systematically using Postman.
- Debugged issues across the shared codebase using VS Code's debugger and browser dev tools, and followed Git-based version control with branching and pull requests while collaborating with a team of 4 developers
- GitHub Copilot, ChatGPT (used for code assistance)

Projects

FinSight – Financial Analytics and Expense Management Platform | [Live Demo](#)

- *Tech Stack:* React.js, Flask, Python, SQLite, JWT, Tailwind CSS, Recharts
- Developed a full stack financial platform supporting **2 user roles** (Admin and Analyst) with **8+ dashboard features** for tracking income, expenses, and savings trends.
- Implemented JWT-based authentication with session expiration and RBAC, reducing unauthorized access risk across all protected routes.
- Built **interactive Recharts visualizations** including category-wise expense breakdowns, monthly income vs. expense charts, and real-time spending alerts.
- Created admin module managing **5 user accounts** with role update, account deletion, and financial health monitoring capabilities.

AI-Powered Resume Screening and Job-Match Tool | [Code Link](#)

- *Python, Groq API (LLM inference), Pydantic, pypdf, python-dotenv*
- AI-powered resume screening pipeline in Python that parses job descriptions and candidate resumes (PDF/DOCX) into structured data using LLM-driven extraction (Groq API, gpt-oss-120b) and Pydantic schema validation.
- Designed structured JSON extraction prompts to reliably convert unstructured job postings and resumes into typed data models, enforcing strict schema compliance and eliminating hallucinated fields.
- Implemented an automated candidate-matching and scoring system that compares parsed resumes against job requirements via LLM reasoning, generating a 0–100 match score, skill-gap analysis, and verdicts for each candidate.
- Ranked and surfaced top/bottom candidates automatically, reducing manual resume review effort by generating sorted shortlists with detailed match breakdowns for HR decision-making.

Education

Bachelor of Technology (B.Tech) | Graduated 2025

Centurion University, Bhubaneswar

GPA equivalent: 92%

Diploma in Engineering | Graduated 2022

Government Polytechnic Aurangabad, Bihar

Percentage: 75.8%

Certifications

Python Full Stack Development — Besant Technologies, Bengaluru
